

Why *Seffshoe*

Dhansai Laboratory and its scientific team have developed a unique multi level numbering system for Indian feet called "DSL number" and "Seffshoe". (Patent pending)

- Seffshoe is the unique design confirming to this unique DSL Numbering System.
-
- With this system every foot can be classified by a unique DSL number and the Footwear which is designed for that foot can be supplied off the shelf.
- It fits just like custom made footwear.
- Its a most comfortable walking Footwear.
- Further to its design and manufacturing excellence, It can accommodate most of the corrections inside the Footwear needed for foot and gait deformities.
- Its toughened toe box with extra depth protects the big toe from hits.
- Its choicest material gives a non-biting all weather performance.
- Its High Grip sole gives stability even on moss and slippery interiors.
- As a result comfort, confidence, grace and speed get added and walking becomes a joyful affair.
- SeffShoe Diabetic/Corrective Footwear is used not only to avoid ulcers but also as corrective normal looking footwear for non diabetic conditions.

The corrective Seffshoe at an appropriate time may avoid problems due to PN and can add pleasure, grace and charm in walking. In most cases one can find immediate changes in this direction after putting on these walking Footwear.

Seffshoe Diabetic Footwear
